CAPABILITY STATEMENT

ZIMMCOM

About Zimmcom

Established in 2016, Zimmcom is a South Australian-owned construction company delivering civil, infrastructure, utilities, mining and minor construction works across metropolitan, regional and remote environments. With our head office in Adelaide and a strategically located regional base in Port Lincoln, we support clients across a broad range of public and private sector projects.

Zimmcom delivers practical construction solutions across civil works, earthworks, road construction, drainage, utilities, water and wastewater infrastructure, and supporting works for transport and mining projects. Our teams are experienced in managing varied site conditions, complex logistics and stakeholder-sensitive environments while maintaining strong standards for safety, quality and programme control.

Through our partnership with Wanggami Civil, Zimmcom brings culturally informed engagement to projects delivered in Aboriginal communities, supporting respectful On Country delivery, local employment and long-term community outcomes.

Core Capabilities

Zimmcom delivers a broad range of construction services across multiple sectors, with flexible crews, practical supervision and scalable project delivery capability.

Earthworks

- Bulk and detailed earthworks
- Dam construction and embankment work
- Evaporation lagoons including sludge removal
- Cut and fill operations
- Remediation
- Pad construction and site preparation

Road Infrastructure

- Road construction and rehabilitation
- Pavement construction and repairs
- Mining access roads and haul roads
- Road shoulders and verge works
- Footpaths, hardstands and slabs
- Concrete works

Electrical, Water and Wastewater Utilities

- Waste Water – PVC, GRP, HDPE
- Water Main, PVC, DICL, MSCL
- Electrical conduits & Common service trench
- Water and wastewater pipelines, sewer infrastructure and service connections

Our Fleet

Zimmcom operates a modern fleet of plant and equipment, enabling efficient and dependable delivery across a wide range of construction projects throughout South Australia.

Our fleet includes:

- Excavators ranging from 8t to 25t
- Tandem tip trucks and truck & trailer combinations
- Skid steers, front-end loaders and specialist pipe trailers
- Fully equipped site vehicles and low-loader capability

Our Port Lincoln yard permanently houses regional plant and equipment to support rapid mobilisation for regional and remote projects.

Our Capacity

Zimmcom maintains strong construction capacity through experienced crews, flexible resourcing and scalable delivery capability. Our workforce includes construction managers, supervisors, operators, trades and labourers experienced across civil, infrastructure, utilities and remote works.

This capacity allows us to respond effectively to varied workloads, maintain continuity of service and mobilise

Our People

Zimmcom's people are central to our delivery capability and ongoing success. Our team brings together experienced construction managers, supervisors, operators, trades and support staff with strong practical knowledge across civil, infrastructure, utilities and regional construction projects. This depth of experience allows us to deliver works safely and efficiently across a wide range of construction environments.

We place a strong focus on developing and maintaining a capable workforce through ongoing training, competency development and leadership support. This ensures our teams are well-equipped to manage varying project demands, site conditions and delivery challenges, while maintaining consistent standards for safety, quality and performance.

Through our partnership with Wanggami Civil, Zimmcom strengthens its capability through Aboriginal-led cultural insight and meaningful community engagement. We are committed to supporting local employment and participation, while maintaining a collaborative, practical and solutions-focused approach across all projects.

Our Values

The principles that guide how we work

Our Vision

To be a leading civil contractor, recognised for excellence, reliability and strong partnerships across industry and community

Our Mission

To deliver reliable construction solutions through strong leadership, practical expertise and collaborative partnerships, while creating lasting value for clients, communities, employees and delivery partners

Corporate Social Responsibility

Zimmcom is committed to being a socially responsible business through conscious hiring practices, accountability and transparency to the communities and environments in which we operate. We recognise our responsibility extends beyond construction delivery and includes contributing positively to people, communities and long-term industry capability.

Community Engagement

We are committed to having a positive impact in the communities where we work by supporting and empowering young people through employment, apprenticeships and traineeships. Approximately 15% of our workforce is currently undertaking traineeships or apprenticeships, reflecting our commitment to developing future industry skills. We promote an inclusive workplace that respects all people and cultures, and through our partnership with Wanggami Civil, support Aboriginal participation and culturally informed engagement.

Environmental Sustainability

Zimmcom is committed to supporting a sustainable future by minimising our environmental footprint across all work practices. This includes efficient planning and use of plant and equipment, waste minimisation, reuse and recycling where practicable, and sourcing materials locally where possible to reduce emissions and environmental impact.

Management Systems

Zimmcom operates an integrated management system designed to support safe, compliant and consistent delivery across all projects. Our systems are underpinned accreditation to ISO 9001:2015 for Quality Management, ISO 14001:2015 for Environmental Management and ISO 45001:2018 for Occupational Health and Safety.

These systems are supported by Skytrust, which provides real-time visibility of incident reporting, risk management, SWMS, inspections, plant pre-starts and competency tracking. Together, these tools strengthen assurance, improve traceability and help our teams identify and control risk early, particularly in regional and remote environments.

Our management systems support continuous improvement through regular review, workforce consultation, competency development, subcontractor control and disciplined quality and environmental processes. This framework enables Zimmcom to deliver high standards of performance while maintaining strong alignment with client specifications, statutory obligations and community expectations.

Our Projects

Zimmcom has consistently demonstrated its ability to deliver a wide range of complex projects on time, to a high standard of quality, and with a strong commitment to safety including:

Gawler Rail Electrification Project | Acciona | DIT

Civil and supporting infrastructure works delivered within a live rail corridor, including earthworks, drainage and interface management in a high-risk operating environment

Regency to Pym Street Upgrade | McConnell Dowell | DIT

Civil construction works supporting a major transport infrastructure project, involving earthworks, drainage and services coordination within an urban corridor

Port Wakefield to Port Augusta Highway Duplication | CPB Contractors | DIT

Regional civil infrastructure works supporting highway duplication, delivered in a live traffic environment with complex staging and logistics.

Bolivar Rising Main and Gravity Sewer | Fulton Hogan Utilities | SA Water

Construction of rising main and gravity sewer infrastructure, including trenching, pipe installation, testing and reinstatement works within an operational network

Red Hill Augmentation Works | SA Water

Delivery of approximately 1.01 km of DN300 PVC water main and associated works, including underboring to minimise traffic disruption.

Onkaparinga Heights F1 & F2 | Service Stream| SA Water

Construction of approximately 1.5 km of water main, including valve installations, creek underbore and road crossings.

Wellington East Township Reticulation | Service Stream | SA Water

Delivery of new water infrastructure through a township environment, including PRV installation and material reuse strategies.

Eyre Peninsula Regional Backlog & Reactive Works | SA Water

Ongoing civil and utilities works including valves, chambers, connections, maintenance and minor construction across regional SA.
